

My eHealth Record

Accessing MeHR via CareSys

****Please be advised that CareSys displays MeHR as SEHR****

How to access and view a patient's MeHR Record from CareSys

My eHealth Record can also be accessed from CareSys for registered consumers allowing hospital clinicians to view medical information sent from other health facilities. Information is also sent to the MeHR from CareSys when a Discharge Summary is created.

When the patient's record has been accessed in CareSys, the SEHR icon may be located in several different locations depending on which CareSys modules you are using.

If the SEHR status is indicated as SEHR Status: Not Registered and the SEHR icon is displaying in red, this indicates that the consumer is not registered with My eHealth Record.

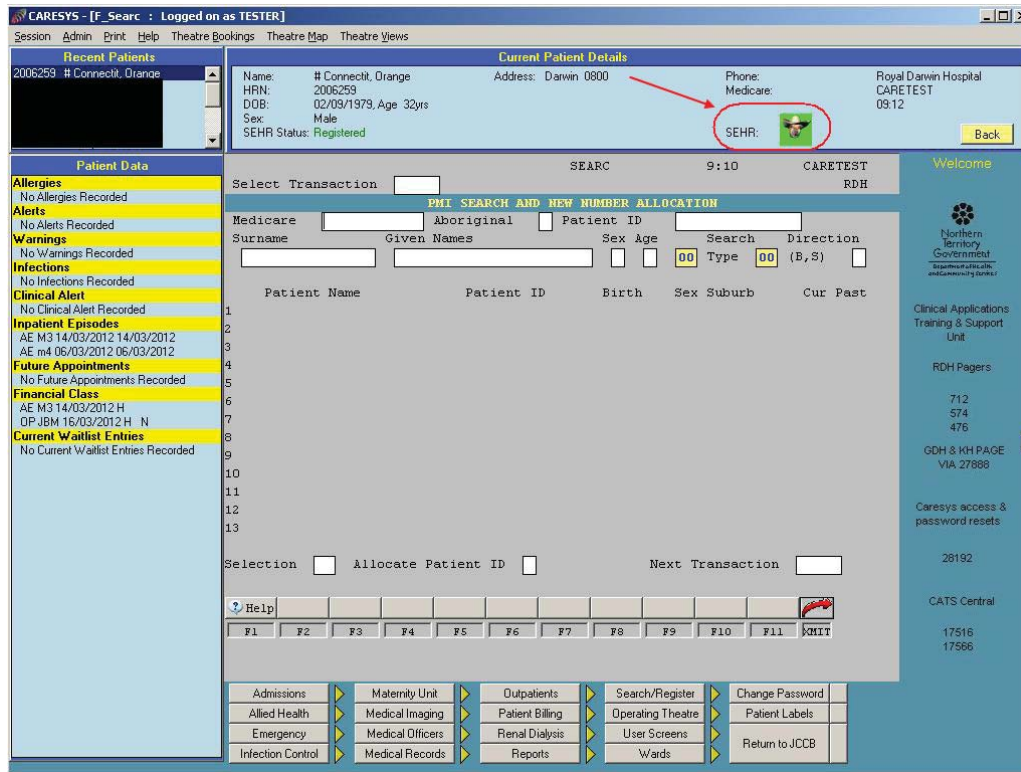

Current Patient Details			
Name: Test, Citrix	Address: 45 Curly Mo Drive Araluen 0870	Phone: Medicare:	Royal Darwin Hospital NT HIS 10:41
HRN: 2049665			
DOB: 05/07/2009, Age 2yrs			
Sex: Male		SEHR: 	Back
SEHR Status: Not Registered			

If the SEHR status is indicated as SEHR Status: Registered and the icon is displaying in green, this indicates that the consumer is registered with My eHealth Record.

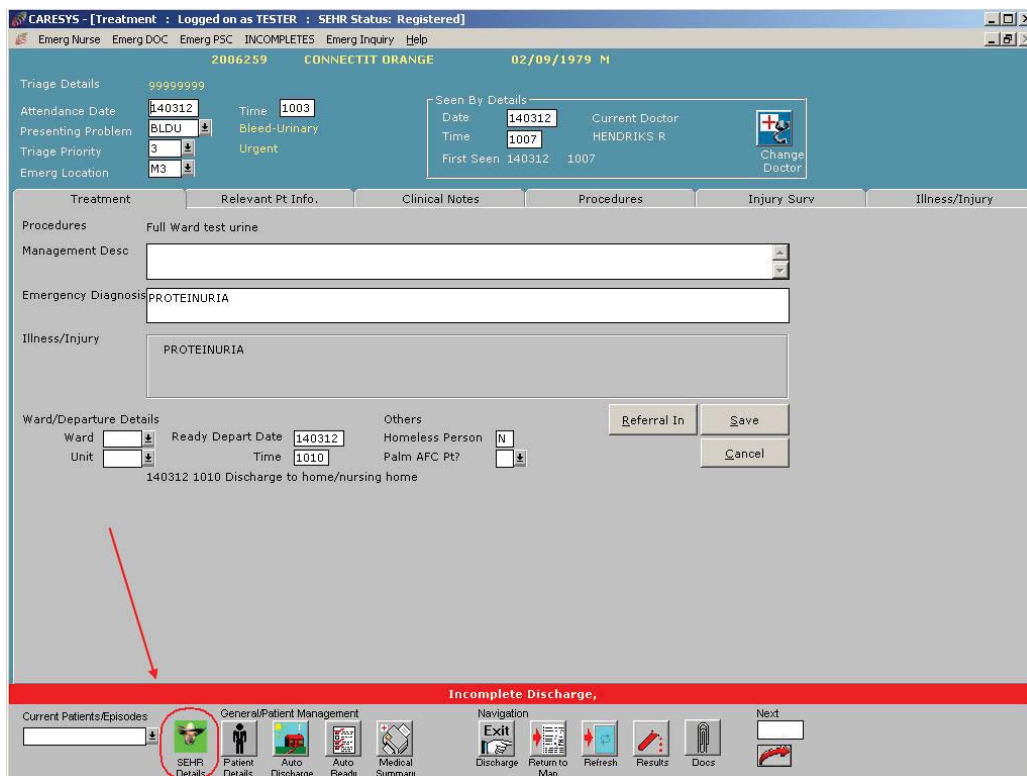

Current Patient Details			
Name: Test, Test4	Address: Port Augusta 5700	Phone: Medicare:	Royal Darwin Hospital NT HIS 10:32
HRN: 2042272			
DOB: 12/08/2001, Age 10yrs			
Sex: Female		SEHR: 	Back
SEHR Status: Registered			

To view the MeHR record of a registered consumer click on the SEHR icon from the CareSys module you are accessing.

From the CareSys Current Patient Details screen click on the SEHR icon from the top of the screen.

From the Emergency Department module, click on the SEHR icon at the bottom of the screen.

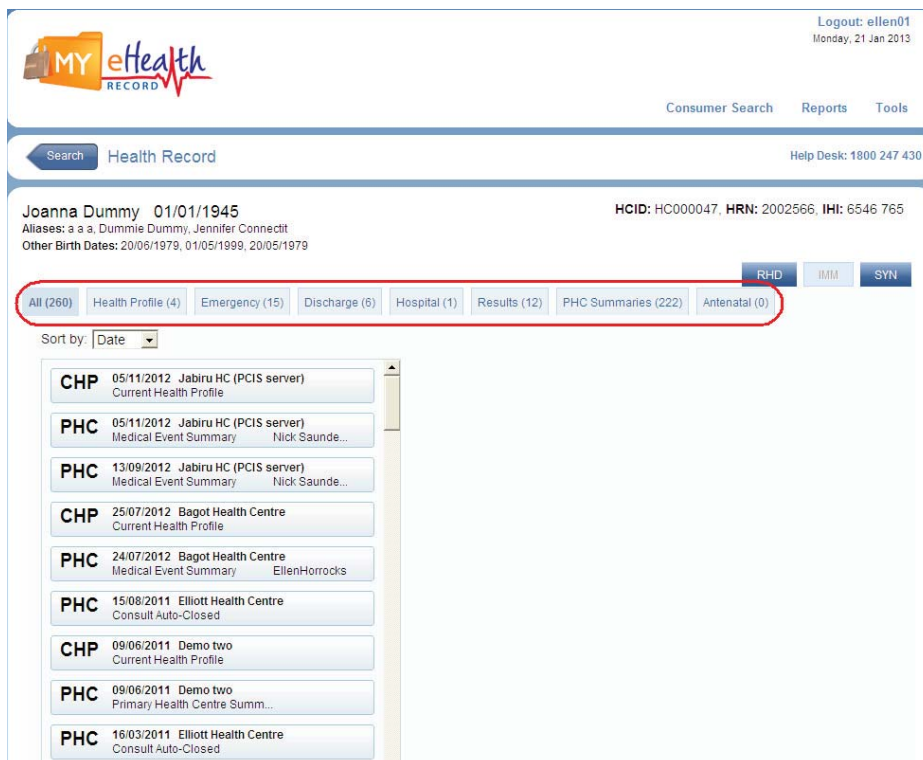

From the JCCB Patient Booking module click on the SEHR icon from the toolbar at the top of the screen.

After clicking the SEHR icon the consumer's MeHR Health Record page will automatically display within CareSys.

The consumer's My eHealth Record can now be accessed. Heading tabs will display on the Health Record for each different document type. The total number of each document type available is indicated in the brackets beside the headings. To access **all** the documents available under each tab, click on the tab i.e. Emergency (15), this will show the full list of documents available in that group.

To access **individual** documents, click on the desired document from the Events List. The document will display on the right hand side of the screen. To view the document in the full screen, click **Full View & Print**. This will hide the Events List. Click **Show Events** to view the events list again.

Click **Search** to return to the Consumer Search page.

No data	No data

Date of ED Attendance: 13 August 2008

Time Seen By Doctor:

Time of Triage: 08:34:00

Triage Category: Semi Urgent

Referring Doctor: . NO GP NOMINATED

The main Health Record page of the MeHR is divided into eight clinical category tabs. A brief description of these tabs can be found by hovering the mouse over each tab.

All: The **All** tab displays a list, in most recent date order, of all document, summaries and reports sent to MeHR.

Health Profile: The **Health Profile** tab contains Current Health Profiles (CHP). These health profiles are the general medical history of the patient which are updated automatically after each consultation.

Emergency: The **Emergency** tab contains NT Hospital Emergency Department Discharge Summaries only. Emergency Department Discharges are summaries of the patient's outpatient treatment at an Emergency Department.

Discharge: The **Discharge** tab contains NT Hospital Discharge Summaries. These are discharge summaries following an inpatient stay in hospital (or outpatient documents) that are supplied following a consultation performed by a hospital clinician in an outpatient environment.

Hospital: The **Hospital** tab contains NT Hospital Outpatient and Other Hospital Documents. These types of documents are hospital documents that are supplied following a consultation performed by a hospital clinician, ie Specialist letters and some examination results.

Results: The **Results** tab contains Pathology and NT Hospital Medical Imaging Reports. The pathology reports are supplied from Primary Health Centres and Medical Imaging reports are supplied from non inpatient hospital episodes.

PHC Summaries: The **PHC Summaries** tab contains Primary Health Centre Summaries (PHC) and Event Summaries (ES) which are sent to MeHR after each consultation that is performed from a primary health centre.

Antenatal: The **Antenatal** tab contains Antenatal Reports of a patient's antenatal visit at a Primary Health Centre. Antenatal Reports contain information gathered from the antenatal template from the consumer's Clinical Information System. The Antenatal reports are updated after every visit similar to a Current Health Profile.

Footnote: We do advise that a patient's record may not be complete. The patient has the right to advise if they do not want the medical event sent to their My eHealth Record.

To close the My eHealth Record to return to CareSys, click on the Close button at the bottom right hand corner of the screen.
