My eHealth Record

Accessing MeHR via Clinical Workstation

****Please be advised that Clinical Workstation displays MeHR as SEHR****

How to access and view a patient's MeHR Record from Clinical Workstation

My eHealth Record can be accessed from Clinical Work Station (CWS) and also receives discharge notifications and specialist consultation letters created in Clinical Work Station.

When the patient's record has been accessed in Clinical Work Station, the SEHR Icon and status can be viewed at the top of the record.

If the SEHR status is indicated as SEHR Status: Not Registered and the icon is displaying in red, this indicates that the consumer is not registered with My eHealth Record.

After clicking the SEHR icon the Consumer's Health Record Index page will automatically display within CWS. The consumer's My eHealth Record can now be accessed. Heading tabs will display on the Health Record for each different document type. The total number of each document type available is indicated in the brackets beside the headings. To access **all** the documents available under each tab, click on the tab i.e. Emergency (15), this will show the full list of documents available in that group.

Date of ED Attendance: 13 August 2009

Time Seen By Doctor:

Time of Triage: 08:34:00

Triage Category: Semi Urgent

Referring Doctor: . NO GP NOMINATED

The main Health Record page of the MeHR is divided into eight clinical category tabs. A brief description of these tabs can be found by hovering the mouse over each tab.

All: The **All** tab displays a list, in most recent date order, of all document, summaries and reports sent to MeHR.

Health Profile: The **Health Profile** tab contains Current Health Profiles (CHP). These health profiles are the general medical history of the patient which are updated automatically after each consultation.

Emergency: The **Emergency** tab contains NT Hospital Emergency Department Discharge Summaries only. Emergency Department Discharges are summaries of the patient's outpatient treatment at an Emergency Department.

Discharge: The **Discharge** tab contains NT Hospital Discharge Summaries. These are discharge summaries following an inpatient stay in hospital (or outpatient documents) that are supplied following a consultation performed by a hospital clinician in an outpatient environment.

Hospital: The **Hospital** tab contains NT Hospital Outpatient and Other Hospital Documents. These types of documents are hospital documents that are supplied following a consultation performed by a hospital clinician, ie Specialist letters and some examination results.

Results: The **Results** tab contains Pathology and NT Hospital Medical Imaging Reports. The pathology reports are supplied from Primary Health Centres and Medical Imaging reports are supplied from non inpatient hospital episodes.

PHC Summaries: The **PHC Summaries** tab contains Primary Health Centre Summaries (PHC) and Event Summaries (ES) which are sent to MeHR after each consultation that is performed from a primary health centre.

Antenatal: The **Antenatal** tab contains Antenatal Reports of a patient's antenatal visit at a Primary Health Centre. Antenatal Reports contain information gathered from the antenatal template from the consumer's Clinical Information System. The Antenatal reports are updated after every visit similar to a Current Health Profile.

Footnote: We do advise that a patient's record may not be complete. The patient has the right to advise if they do not want the medical event sent to their My eHealth Record.

To close the My eHealth Record to return to Clinical Work Station, click on the Close button at the bottom right hand corner of the screen.
