My eHealth Record

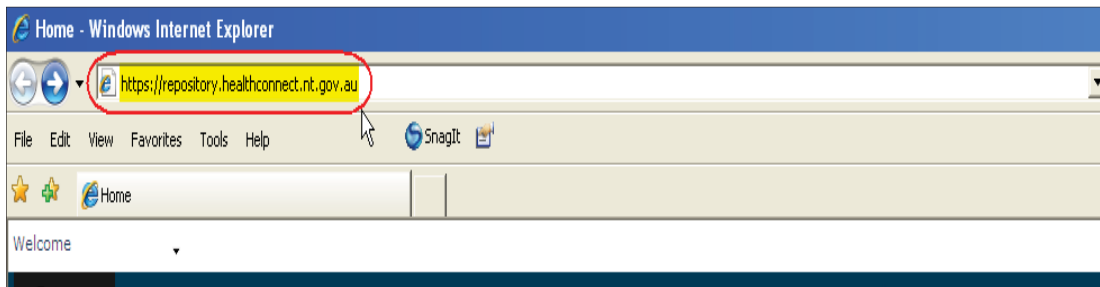

Searching for Visitors to your Health Centre

How to search and view a visitor to the Health Centre in MeHR

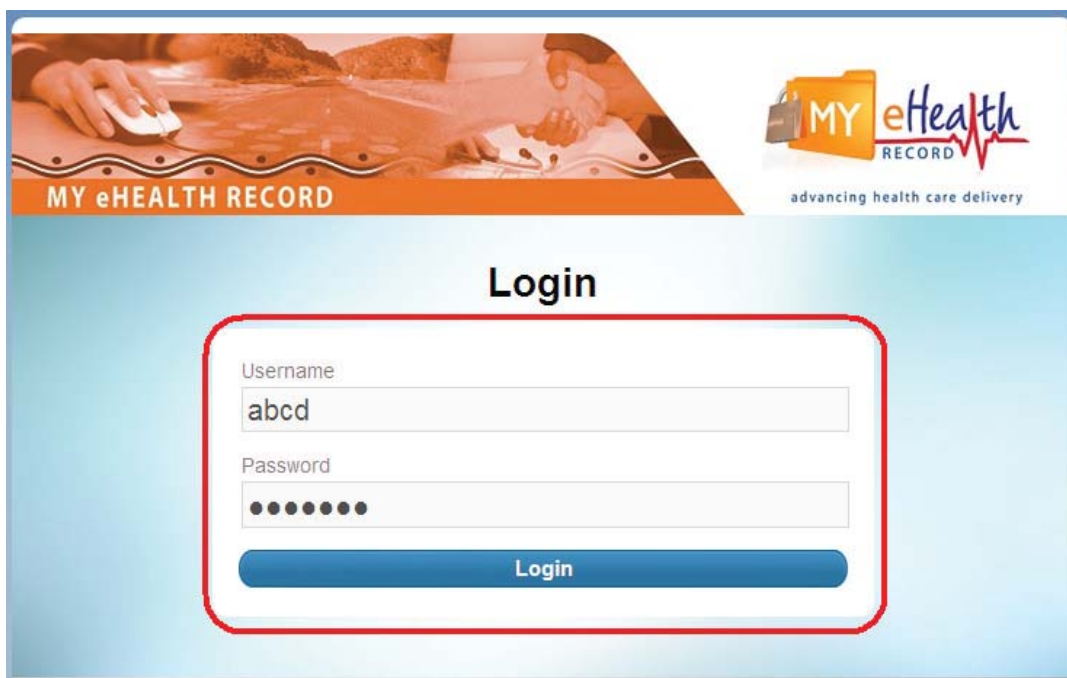

To search for a visitor's record in the My eHealth Record, go to the MeHR repository on the internet.

The MeHR repository address is: <https://repository.healthconnect.nt.gov.au>

Make sure that the S is included in the https.

The logon page for the My eHealth Record will then display. Enter your user name and password into the Sign In fields. Click the Login button to enter the repository.

The MeHR Consumer Search page will automatically display after logging in.

Searching for a consumer can be performed as either a **Details Search** or an **Id Search**. Enter the consumer information on the Details Search tab to search for your consumer by their demographic details. Click **Find** or click **Reset** to clear all search fields.

Showing 1 to 11 of 11 entries Previous Next

When you have located the patient and opened the Health Record page, heading tabs will display for each different document type. The total number of each document type available is indicated in the brackets beside the headings. To access **all** the documents available under each tab, click on the tab i.e. Emergency (15), this will show the full list of documents available in that group.

Date of ED Attendance: 13 August 2008

Time Seen By Doctor:

Time of Triage: 08:34:00

Triage Category: Semi Urgent

Referring Doctor: . NO GP NOMINATED

The main Health Record page of the MeHR is divided into eight clinical category tabs. A brief description of these tabs can be found by hovering the mouse over each tab.

All: The **All** tab displays a list, in most recent date order, of all document, summaries and reports sent to MeHR.

Health Profile: The **Health Profile** tab contains Current Health Profiles (CHP). These health profiles are the general medical history of the patient which are updated automatically after each consultation.

Emergency: The **Emergency** tab contains NT Hospital Emergency Department Discharge Summaries only. Emergency Department Discharges are summaries of the patient's outpatient treatment at an Emergency Department.

Discharge: The **Discharge** tab contains NT Hospital Discharge Summaries. These are discharge summaries following an inpatient stay in hospital (or outpatient documents) that are supplied following a consultation performed by a hospital clinician in an outpatient environment.

Hospital: The **Hospital** tab contains NT Hospital Outpatient and Other Hospital Documents. These types of documents are hospital documents that are supplied following a consultation performed by a hospital clinician, ie Specialist letters and some examination results.

Results: The **Results** tab contains Pathology and NT Hospital Medical Imaging Reports. The pathology reports are supplied from Primary Health Centres and Medical Imaging reports are supplied from non inpatient hospital episodes.

PHC Summaries: The **PHC Summaries** tab contains Primary Health Centre Summaries (PHC) and Event Summaries (ES) which are sent to MeHR after each consultation that is performed from a primary health centre.

Antenatal: The **Antenatal** tab contains Antenatal Reports of a patient's antenatal visit at a Primary Health Centre. Antenatal Reports contain information gathered from the antenatal template from the consumer's Clinical Information System. The Antenatal reports are updated after every visit similar to a Current Health Profile.

Footnote: We do advise that a patient's record may not be complete. The patient has the right to advise if they do not want the medical event sent to their My eHealth Record.
